

Hardware_Tools

This file will become your README and also the index of your documentation.

Developer Guide

If you are new to using nbdev here are some useful pointers to get you started.

Install Hardware_Tools in Development mode

```
# make sure Hardware_Tools package is installed in development mode
$ pip install -e .

# make changes under nbs/ directory
# ...

# compile to have changes apply to Hardware_Tools
$ nbdev_prepare
```

Usage

Installation

Install latest from the GitHub [repository](#):

```
$ pip install git+https://github.com/bthek1/Hardware_Tools.git
```

or from [conda](#)

```
$ conda install -c bthek1 Hardware_Tools
```

or from [pypi](#)

```
$ pip install Hardware_Tools
```

Documentation

Documentation can be found hosted on this GitHub [repository](#)'s [pages](#). Additionally you can find package manager specific guidelines on [conda](#) and [pypi](#) respectively.

How to use
